

## FAQ: eibPort change language

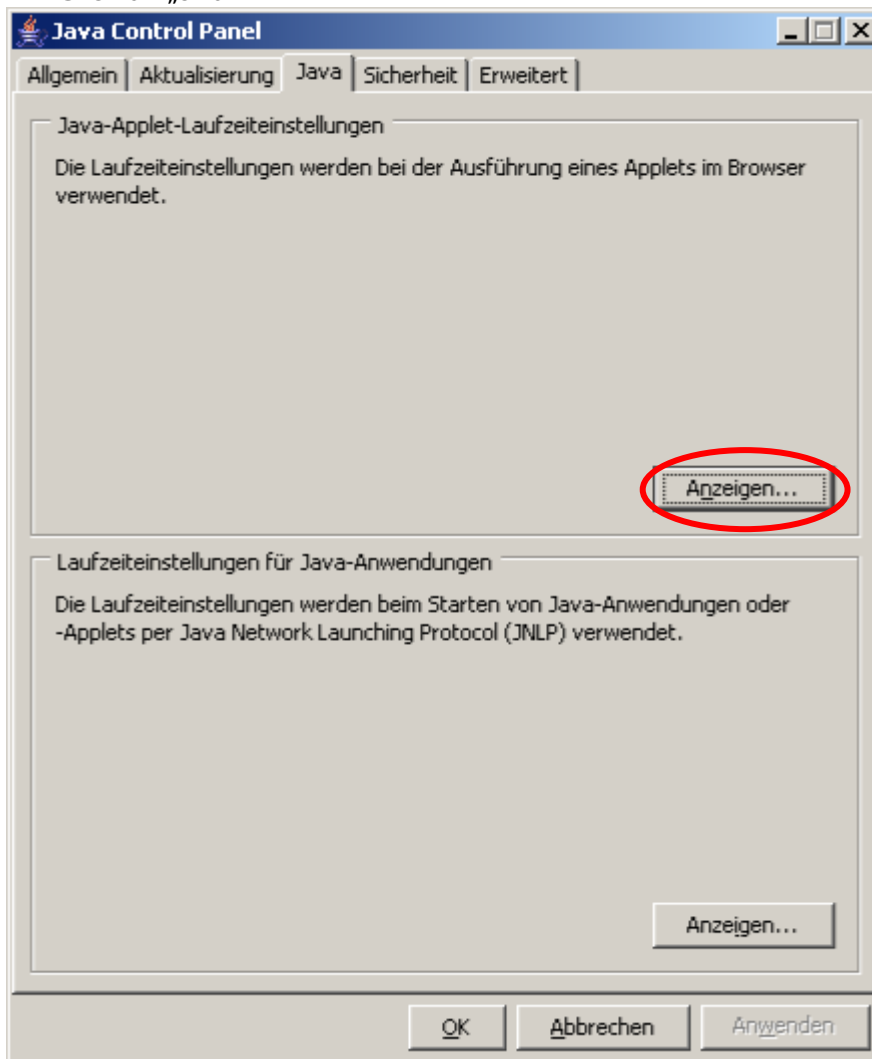

To change the language of the eibPort visualization a parameter has to be changed or added in the Java software. Follow these instructions:

- In Windows click on start -> System -> Control Panel
- Click twice on the Java icon   
Java
- Click on the tab „Java“

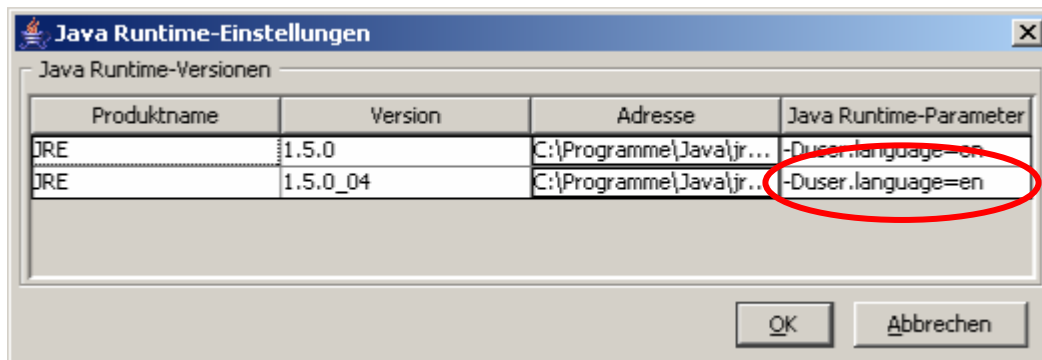

## FAQ: eibPort change language

- Click on „show“

### FAQ: eibPort change language

- Enter the parameter for the preferred language:
  - German        -Duser.language=de
  - English       -Duser.language=en
  - Swedish       -Duser.language=se
  - French         -Duser.language=fr
  - Spanish       -Duser.language=es
  - Dutch          -Duser.language=nl
  - Italian        -Duser.language=it

Consideration: If you have installed several Java versions be sure to enter the parameter for all the versions.

- Close the Java Control Applet
- Close the browser and any other applications that need Java. Restart the browser and access eibPort. Now the preferred language will be set.
